

Be careful with your scissors

*Thank you Bertie,
you are getting a lot of stick lately because
your ingenious Internet policies have simply
priced us out of using the Net to any great extent.
But that is really a blessing in disguise.
We know what's on the Internet: Filth, sex and
nudity. The less our Irish lassies and lads are
using this corrupting medium the better.
Well done Bertie! Keep up the good work! And keep
an eye on your new Communications Minister -
he might yet spoil your great achievements.
Regards*
